EDUCATION

Instituto Tecnológico de Nuevo Laredo
(TecNM)
Computer Systems Engineering
2021 – 2026
CBTis #234
Technical Degree in Computer Systems
2018 – 2021

CERTIFICATIONS

Claude Code in Action
Anthropic
Aug 2026
EF SET English Certificate
B2 Upper Intermediate (59/100)
Jan 2026

LANGUAGES

Spanish Native
English B2 Conversational

PROFESSIONAL PROFILE

Computer Systems Engineer focused on designing and implementing scalable web and mobile solutions in enterprise environments, with a strong focus on system efficiency, software architecture, and continuous improvement. Passionate about adopting modern technologies and AI-assisted workflows, combining solid technical skills with effective teamwork and emotional intelligence.

WORK EXPERIENCE

ADUASIS NLD

Dec 2023 – Present

Nuevo Laredo, Mexico (Remote)

- **Previos APK — Offline-First Mobile Inspection App:** Designed and developed an offline-first mobile application for on-site merchandise inspections at customs yards (photo evidence, invoice logs, discrepancy tracking and automated report generation), increasing operational productivity by 65% by allowing inspections to continue without internet connectivity.
- **ATC System — Customs Entry Pre-validator & Q File Generator:** Co-led the complete migration of a legacy PHP system — unmaintained and slow — to a modern customs entry pre-validation platform with automated Q file generation, applying hexagonal architecture and AI-assisted engineering, improving portal performance by 40%.
- **Value Declaration System:** Contributed to the design and implementation of the module: core process workflows, system catalogs and business logic for customs operations.
- **Operational Reports Redesign (client: Welldex):** Re-engineered customs reporting workflows, designing advanced report templates and business logic that streamlined data processing and official document generation.

FREELANCE PROJECTS

Oct 2024 – Jul 2025

Nuevo Laredo, Mexico

- **Urbabus — Real-Time Public Transit Tracking:** Designed and deployed a telematics platform for real-time geolocation tracking of public transit vehicles: GPS data ingestion from tracking devices, processing servers and dedicated infrastructure (VPS).

SKILLS

Backend & Architecture: RESTful APIs, GraphQL, Hexagonal & Clean Architecture, Authentication (JWT, OAuth), Requirements Analysis.

Frontend & Mobile: Responsive web applications, offline-first mobile applications.

Databases: PostgreSQL, MySQL, SQL Server, SQLite.

Tools & Platforms: Git, Docker, Postman, Cloud deployment (VPS, Vercel, Railway), AI-assisted development (Claude Code).
